DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-16, 21 and 22, drawn to a method for locating mobile units within an area using a wireless local area network that include using data representing received reference signal characteristics and database relating signal characteristics of signals transmitted by the reference signal transmitters to determine the position of a mobile unit and, classified in class 455, subclass 456.5.
- II. Claims 17-20, drawn to a mobile unit comprising: a radio unit that receives reference signals through a first selected channel and transmit and receive data signals using a data communication channel different from the first channel and determining received signal characteristics of the received signals to generate data representing the received signals characteristics and cause the radio unit to transmit a data message having the generated data, classified in class 455, subclass 67.11.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one

subcombination is separately usable. In the instant case, subcombination II has separate utility such as monitoring and determining received signal characteristics, while subcombination I has separate utility such as location or position determining. See MPEP § 806.05(d).

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
